

ADI Control Privacy Policy

Effective Date: September 18, 2026 · Sonic Control LLC · www.soniccontrolstudios.com

Overview

ADI Control and ADI Control (DAC Edition) are Stream Deck plugins developed by Sonic Control LLC, one for each supported RME ADI-2 unit. We are committed to protecting your privacy. This policy explains what data our plugins access, how it is used, and how it is stored.

Data Collection

We do not collect, transmit, store, or share any personal data.

Our plugins operate entirely on your own computer. No data is sent to Sonic Control LLC, Elgato, RME, or any third-party servers by the plugin.

Device Communication

ADI Control communicates exclusively with your RME ADI-2 hardware over a direct, local USB connection using class-compliant MIDI System Exclusive (SysEx) messages. This communication:

- Occurs only between your computer and the ADI-2 unit connected to it by USB;
- Requires no network, no IP address, and no configuration of any address or account;
- Does not traverse the internet;
- Does not pass through any external servers;
- Contains only device control commands and status data (for example, volume levels, filter and reference-level selections, EQ and tone settings, and button states).

Data Storage

ADI Control stores the following data locally on your computer using the Stream Deck SDK's built-in settings system:

- Your per-action configuration preferences (selected channel targets, EQ band assignments, step sizes, and similar options);
- Plugin state (last known values such as volume levels, filter selections, and button states).

This data is stored locally by the Stream Deck application and is never transmitted externally by the plugin. You can remove this data at any time by removing the plugin's actions or uninstalling the plugin.

Payments and Purchases

ADI Control is purchased through the Elgato Marketplace. Any payment, billing, or account information you provide during purchase is collected and processed by Elgato, not by Sonic Control LLC. We do not receive, process, or store your payment details. Elgato's handling of that information is governed by Elgato's own privacy policy.

Third-Party Services

ADI Control does not integrate with, communicate with, or send data to any third-party services, analytics platforms, advertising networks, or cloud services.

Cookies and Tracking

The ADI Control plugin does not use cookies, tracking pixels, analytics, or any form of user tracking. (For analytics used on our website, see "Website Analytics" below.)

Website Analytics

This privacy policy covers the ADI Control plugin, which collects no data. Separately, our website (soniccontrolstudios.com) uses Google Analytics (GA4) to understand general site traffic and improve the experience. This applies only to the website, not to the ADI Control plugin, which continues to collect and transmit no data whatsoever.

Google Analytics may set cookies and collect usage data such as pages visited, time on site, browser type, device information, and approximate location derived from your IP address. Some of this information may constitute personal data under applicable law. This data is processed by Google as our analytics provider, and may be transferred to and stored on servers operated by Google, including in the United States.

Where required by law (including for visitors in the European Economic Area and the United Kingdom), we load Google Analytics only after you provide consent through the cookie banner presented on our website. You may withdraw consent at any time through the cookie controls on the website, decline non-essential cookies, or use Google's browser opt-out add-on. If you do not consent, Google Analytics is not loaded and no analytics cookies are set.

We retain website analytics data only for as long as necessary for the purposes described above, in accordance with the retention settings available in Google Analytics.

Your Rights (EEA / UK Visitors)

If you are located in the European Economic Area or the United Kingdom, the General Data Protection Regulation (GDPR) and UK GDPR give you rights over any personal data processed through our website. Because the ADI Control plugin collects no data, these rights relate to website analytics data only.

Legal basis: We process website analytics data on the basis of your consent, which you provide through our cookie banner. You may withdraw that consent at any time.

Your rights include the right to access the personal data we hold about you; to request correction or erasure; to object to or restrict processing; to data portability; and to withdraw consent at any time. You also have the right to lodge a complaint with your local data protection supervisory authority.

To exercise any of these rights, contact us at support@soniccontrolstudios.com. As our website relies on Google Analytics, some requests may also be directed to, or require action through, Google as the analytics provider.

Your Rights

Because ADI Control does not collect or transmit personal data, there is no personal information from the plugin for us to access, correct, export, or delete. Any configuration data created by the plugin remains on your own computer and under your control, and can be removed as described under "Data Storage" above. Rights relating to website analytics data are described under "Your Rights (EEA / UK Visitors)" above. If you have questions about your privacy rights, you may contact us using the details below.

Children's Privacy

ADI Control is professional audio software not directed at children. We do not knowingly collect information from children under the age of 13 (or under 16 in jurisdictions, such as the European Economic Area, where that higher age applies). Because the plugin collects no personal data from any user, no such information is gathered in any case.

Changes to This Policy

We may update this privacy policy from time to time. Any changes will be reflected in the "Effective Date" above. Continued use of the plugin after changes constitutes acceptance of the updated policy.

Trademarks

ADI Control is developed independently by Sonic Control LLC and is not affiliated with, endorsed by, or sponsored by RME or its manufacturer, or by Elgato/Corsair. "RME" and "ADI-2" are trademarks of their respective owner(s). "Elgato," "Stream Deck," and "Corsair" are trademarks of Corsair Gaming, Inc. and/or its affiliates. All other trademarks are the property of their respective owners and are used solely for identification and compatibility purposes.
